DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to a high pressure system, classified in class 425, subclass 77.
 - II. Claims 25-42, drawn to a method of growing crystalline bodies at high pressure, classified in class 264, subclass 446.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case apparatus as claimed can be used to practice another and materially different process, such as placing the material into a high pressure reactor, instead of a die chamber.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different patentability issues, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. David Osborne on May 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
